SUMMARY

Full Stack Developer with **2 years** of experience building scalable, production-ready web applications using **TypeScript, Node.js, MongoDB and AWS.** Delivered an **enterprise ERP** with SAP integration and **RBAC-secured REST APIs**, from requirements gathering to cloud deployment on AWS. Hands-on with **AI-powered** development using **LangChain, OpenAI API and RAG pipelines**.

EDUCATION

Rajasthan Technical University, Kota ***2021 - 2025***

Bachelor of Technology (B. Tech) | Computer Science & Engineering | ***8.54 CGPA***

PROFESSIONAL EXPERIENCE

HG Infra Engineering Ltd. | *Full Stack Developer* ***Aug 2025 - Current***

- Architected and built **BuildSync**, a production-grade **ERP** that digitizes on-site workflows for **12+ project sites**. Developed scalable **RESTful APIs** with **Node.js, Express.js and MongoDB aggregation pipelines**, replacing manual, paper-based processes.
- Developed **25+ reusable Next.js** modules with Material UI and Tailwind CSS for Machine Allocation, Time Logs, RFI tracking and Dashboard Analytics, giving site and management teams **real-time operational visibility**.
- Integrated SAP and external enterprise services, and secured the platform with Firebase Authentication, JWT and RBAC across **15+ user roles**. This enabled **automated data sync** and **role-specific approval workflows** with no duplicate data entry.
- Collaborated with cross-functional teams to **gather and analyse business requirements**, translating on-ground workflows into technical specifications and production-ready features.
- **Managed end-to-end deployments** of BuildSync on **ESDS enterprise cloud**, and integrated **AWS S3** for secure document and attachment storage, ensuring reliable releases and scalable file handling across modules.

Hornet Dynamics | *Backend Developer Trainee* ***Apr 2025 – Jul 2025***

- Built and deployed secure **RESTful APIs** in **Node.js** and **Express.js** with schema-based input validation and **JWT/Firebase role-based access control (RBAC)** across multiple user roles, cutting manual data-entry errors and **reducing platform downtime by 20%** through proactive debugging and monitoring.

Fixl Solutions | *Backend Developer Intern* ***Jul 2024 – Dec 2024***

- Developed responsive **React.js frontends** and integrated **REST APIs** for the D2C and Cubicle project management platforms, building **JIRA/Confluence**-style workflow modules (task tracking, documentation, approvals) that streamlined team collaboration and day-to-day project tracking.

SKILLS

- **Languages:** TypeScript, JavaScript, Python
- **Frontend:** React.js, Next.js, Redux, Hooks, SSR, SSG
- **Backend:** Node.js, Express.js, REST API, FastAPI, JWT Authentication, RBAC, Microservices
- **Databases:** MongoDB, MySQL, Chroma Vector Database, Supabase, PostgreSQL
- **AI / GenAI:** LangChain, LangGraph, OpenAI API, RAG, Vision Pipeline Vector Embeddings, Semantic Search
- **Cloud / DevOps:** Git, GitHub Actions, Kubernetes, Docker Compose, CI/CD, Nginx, AWS EC2, S3, Agile/Scrum
- **Integrations:** SAP, Payment Gateway, SMTP, Real Time Chat, Webhooks, Shipment / Logistics

PROJECTS

All About Packing (Link) | *Next.js, Node.js, MongoDB, AWS EC2, Nginx, CI/CD, Razorpay*

- **Independently** architected, built and deployed a **production-grade full-stack e-commerce platform**, owning the **end-to-end lifecycle** from system design and development to cloud deployment and maintenance.
- Built scalable **RESTful APIs** with **Node.js** and **Express.js** for product catalogue, user authentication, cart and order management, using a **modular, maintainable backend architecture**.
- Developed an **SEO-optimized, responsive Next.js frontend** using **server-side rendering (SSR)** for faster page loads and integrated the **Razorpay payment gateway** with secure transaction verification and webhook handling for reliable order processing.
- Deployed on **AWS EC2** with an **Nginx reverse proxy** and **SSL**, automated releases with **CI/CD pipelines** using **GitHub Actions**, and managed **domain** and **DNS configuration**, achieving zero-downtime deployments.

Trade-Analyser AI (Link) | *Next.js, FastAPI, Node.js, LangGraph, Vision Pipeline, RAG, PostgreSQL, Docker*

- Built an **agentic AI trade analysis platform** for **Indian equity markets** using **LangGraph multi-step agent workflows**. It generates data-driven entry, exit, stop-loss, target and risk-reward recommendations for trade decisions.
- Implemented a **Retrieval-Augmented Generation (RAG) pipeline** with **LangChain, vector embeddings** and **semantic search** over custom trading strategy documents. Responses are source-grounded and citation-backed, which **reduces LLM hallucinations**.
- Developed strategy analysis, risk management, paper trading and back-testing modules with **structured LLM outputs** (JSON) and **human-in-the-loop confirmation safeguards**, so no trade signal acts without user approval.
