SUMMARY

Full Stack Developer with 2 years of experience building scalable, production-ready web applications using JavaScript, TypeScript, React.js, Next.js, Node.js, Express.js, and MongoDB. Proven ability to deliver clean, modular, and testable code across the full application lifecycle from responsive UI development to backend API design and cloud deployment. Experienced in REST API development, JWT/RBAC-based authentication, system design, CI/CD pipelines, and AWS cloud infrastructure. Hands-on with AI-powered application development using LangChain, OpenAI API, and RAG pipelines.

EDUCATION

Rajasthan Technical University, Kota **2021 - 2025**
B. Tech. (CSE) | 8.54 CGPA

SKILLS

- **Languages:** TypeScript, JavaScript, SQL, Python
- **Frontend:** React.js, Next.js, Material UI, Tailwind CSS, Redux, Hooks, SSR, SSG
- **Backend:** Node.js, Express.js, REST API, FastAPI, JWT Authentication, RBAC,
- **Databases:** MongoDB, MySQL, Chroma Vector Database, Supabase
- **AI / GenAI:** LangChain, LangGraph, OpenAI API, RAG, Vision Pipeline Vector Embeddings, Semantic Search
- **Cloud / DevOps:** Git, GitHub Actions, Kubernetes, Docker Compose, CI/CD, Nginx, AWS EC2, S3, Agile/Scrum
- **Integrations:** SAP, Payment Gateway, SMTP, Real Time Chat, Webhooks, Shipment / Logistics

PROFESSIONAL EXPERIENCE

HG Infra Engineering Ltd. | Full Stack Developer **Aug 2025 - Current**

- Architected and developed BuildSync, a production-grade enterprise workflow platform, building scalable RESTful APIs using Node.js, Express.js, MongoDB, and aggregation pipelines for business workflows and operations.
- Developed reusable React.js and Next.js interfaces using Material UI and Tailwind CSS for Machine Allocation, Time Logs, RFI, and Dashboard Analytics, integrating frontend components with backend APIs and enterprise services.
- Implemented Firebase Authentication, JWT-based authentication, and RBAC, while integrating SAP and external services to support role-specific workflows and end-to-end application functionality.

Hornet Dynamics | Backend Developer Trainee **Apr 2025 – Jul 2025**

- Developed and deployed RESTful APIs using Node.js and Express.js with strong data validation, reducing manual input errors and improving platform reliability.
- Implemented RBAC for multiple user roles using JWT and Firebase, reducing platform downtime by 20% through proactive debugging and monitoring

Fixl Solutions | Backend Developer Intern **Jul 2024 – Dec 2024**

- Developed React.js frontend interfaces and integrated APIs for the D2C and Cubicle project management platforms, contributing to workflow modules inspired by JIRA, Confluence, and Zoho to improve usability and application functionality.

PROJECTS

All About Packing (Link) | Next.js, Node.js, MongoDB, AWS EC2, Nginx, CI/CD, Razorpay (**Live** – Ongoing)

- Designed and developed a full-stack e-commerce platform independently, managing end-to-end architecture, development, and deployment.
- Built scalable RESTful APIs using Node.js and Express.js for product catalogue, authentication, cart.
- Developed SEO-optimized and responsive frontend using Next.js, and integrated Razorpay payment gateway with secure transaction and webhook handling.
- Deployed and maintained the application on AWS EC2 with Nginx, implemented CI/CD using GitHub Actions, and managed domain/DNS configuration via GoDaddy.

Trade-Analyser AI (Link) | Next.js, FastAPI, Node.js, LangGraph, Vision Pipeline, RAG, PostgreSQL, Docker (**Live**)

- Built an agentic AI trade analysis platform for the Indian stock market to generate entry, exit, stop loss, target, and risk-reward insights.
- Implemented RAG using LangChain/LangGraph and vector embeddings to analyse custom trading theory documents and provide source-grounded responses.
- Developed strategy analysis, risk management, paper trading, and back-testing modules with structured AI outputs and manual confirmation safeguards.

BuildSync (Link) | Next.js, Node.js, MongoDB, JWT, SAP Integration, SMTP (**Live** - Ongoing)

- Built and integrated secure RESTful APIs using Node.js and Express.js, implementing JWT authentication, RBAC, and MongoDB data management for construction workflow operations.
- Developed scalable frontend interfaces using Next.js and Tailwind CSS, improving usability across modules such as Machine Allocation, Time Logs, RFI, and Dashboard Analytics.

AI-Powered Document Query System | LangChain, Node.js, MongoDB, OpenAI API

- Developed a RAG-based document search system using LangChain, OpenAI API, and vector embeddings to enable semantic search across enterprise documents.
- Implemented document chunking, embedding generation, and similarity search using Chroma vector database.
